

I have an account with TikTok and I would like to upload a nine minute mp4 video. I have the video on my desktop PC running windows ten 64 bit. How can I take the Video and load it onto my iPhone on which I have the TikTok application?

PERPLEXITY

There are several ways to transfer a video from a Windows 10 PC to an iPhone for uploading to TikTok:

Transfer the video using iTunes File Sharing:

Connect your iPhone to your PC using a USB cable.

Open iTunes on your PC.

Click on the iPhone icon in the top left corner of the iTunes window.

Click on "File Sharing" in the left sidebar.

Select the TikTok app from the list of apps.

Click "Add" to transfer the video from your PC to your iPhone

Transfer the video wirelessly using iCloud:

Upload the video to iCloud from your PC.

On your iPhone, go to Settings > iCloud > Photos and turn on iCloud Photos.

Wait for the video to sync to your iPhone

2

Transfer the video without iTunes using a third-party app:

Download and install a third-party app like MobileTrans on your PC.

Connect your iPhone to your PC using a USB cable.

Open the app and select "Phone Transfer."

Select the video file you want to transfer and click "Start Transfer"

3

Transfer the video without iTunes by manually copying the file:

Connect your iPhone to your PC using a USB cable.

Open File Explorer on your PC and navigate to "This PC" > [Your iPhone's name] > Internal Storage > DCIM > 100APPLE.

Drag and drop the video file into the 100APPLE folder.

The video will now be available in the Photos app on your iPhone
